Projects & Freelance Work

Digital Wallet Redesign

Improved usability and trust for a fintech app by redesigning onboarding and transaction flows.

Tools: Figma, VS Code

Outcome: Reduced user drop-off by 30% in usability testing through simplified flows and clearer hierarchy.

Food Delivery App Design

Created a user-friendly food delivery interface with clear navigation and real-time order tracking.

Focus: User flow mapping, mobile UI design, color and brand alignment.

Transportation App UI

Designed a ride-hailing app interface with an emphasis on real-time tracking, route mapping, and simple payment screens.

Focus: Rapid prototyping, wireframing, user persona mapping.
